

Hobo Joe from Buckeye wishes the Auxiliaries a Happy Thanksgiving! I am excited that Hobo Joe has a new friend! Meet Clarence the Cow from Chloride working with VFW Post and Auxiliary 2190! Clarence looks like he is keeping busy working with the Auxiliary and Comrades placing flags at the Veterans cemetery. Creating a Pop art image for your Auxiliary can be as simple as using something noteworthy from your town and using AI to make it work for your Auxiliary, or create something that is special to your Post! Of course this is all a learning process making these types of images but it could be something that you use for years to come!

Thinking about learning, the VFW Auxiliary National Organization had a very interesting post on Facebook in October. “Americanism, formerly Americanization, was started in 1932 as the third-ever Continuing Program. Teaching Americans and future Americans about the U.S. Flag, Pledge of Allegiance, National Anthem and other patriotic symbols and history tied closely into this Program, though this education was not concentrated solely at a youth level; Auxiliary members also worked closely with those working toward becoming U.S. citizens to help them along their journey.”

As I have been a member of the Auxiliary for a couple of years there is so much for me to learn. There are so many great mentors within Arizona that learning is as easy as asking questions. So Arizona VFW Auxiliaries I challenge you to keep learning! There is so much out there for us if we just take some time, maybe google, and always ask questions!
